Summary

- Computer Science graduate student majoring in Machine Learning and Data Analytics, with 4.5 years of relevant work experience.

Education

Masters of Computer Science, Arizona State University, Tempe, AZ GPA: 3.67/4.0 **Jan 2016 – Dec 2017**

- *Relevant Coursework:* Data Mining, Foundations of Statistical Machine Learning, Statistical Machine Learning, Data Visualization, Distributed Databases Systems, Information Assurance and Security, Data Structure and Algorithm, Software Design, Software Security, Mobile Computing.

Bachelor of Technology, Nirma University, Ahmedabad, India GPA: 7.39/10 **Jun 2008 – May 2012**

Languages and Technology

- **Languages:** Java, Python, MATLAB, Android
- **Web Technologies:** HTML, CSS, PHP, JavaScript, JQuery, Bootstrap, Maven, AJAX, RESTful Web services, D3.js, XML, JSON
- **Databases:** MySQL, SQLite, PostgreSQL, MongoDB
- **Machine learning:** Classification, Regression, Prediction, Clustering
- **Tools:** Android Studio, CorelDraw, Git, Jenkins, Scrum Development

Employment

Software Engineer Intern, Choice Hotels International **Jun 2017 – Present**

- Restructured and integrated the Gift Card system based on Rest architecture (java) to their existing portal. Created scripts to update the Gift Card database reducing the manual efforts by 90%.
- Improved application quality and stability by analyzing the critical issue, writing Junit test case, resolving the bugs and improving sonar reports.

Student Developer, Herberger Institute of Design and Arts, ASU **Dec 2016 – May 2017**

- Accountable for performing corrective actions on issues highlighted in security scans reports submitted by ASU's Security Dept.
- Leading the migration of legacy PHP applications to the newer version of technologies.

Graduate Service Assistant, Arizona State University **Jun 2016 – Sep 2016**

- Implemented user-interactive dynamic dashboard for data visualization using D3.js and PHP for research project which identifies the cyber-threats from dark web.

Founder, Sol-Savvy Services (startup) **Mar 2014 – Oct 2015**

- Developed desktop and web based accounting software, Pac Savvy aimed at small and medium business enterprises.
- Built Internet booking engine for bike and car servicing by various authorized vendors in India.
- Programmed automated tool which analyses many CSVs given by Reserve Bank of India at single go to categorize and generate the list of applicants whose loan is approved or disapproved with reasons, reducing human efforts nearly by 99 percent.

Software Engineer, Accenture Services Pvt. Ltd. **Oct 2012 – Mar 2014**

- Contributed to Customer Gateway Services (CGS) for Barclays Bank, an interactive web application for various Banking operations.
- Modeled business processes and created impact assessment documents, design documents (RTM), use case, sequence and workflow diagrams of complex client requests for translating into business requirements.
- Programmed in Java to develop 3-4 modules per project release aimed at code reusability and abstraction.

Software Developer Intern, Educational Initiatives Pvt. Ltd. **Dec 2011 – May 2012**

- Developed activity based interactive mathematical games for conceptual understanding in Flash.
- Designed a collaboration platform for students to share ideas, academic projects among their peers in PHP, HTML and JavaScript.

Academic Projects

- **Adversarial Image Classification (2016):** Implemented logistic regression model for classification of images, algorithm to generate adversarial images and studied the effect of adversarial images on machine learning model in MATLAB.
- **Movie Recommendation (2017):** Designed user based and item based movie recommendation system based on the data set provided by IMDB by implementing various machine learning algorithm such as Logistic Regression, KNN, SVM etc. in MATLAB.
- **Stock Market Analytic Tool (2017):** Developed an interactive tool for stock market investors to analyze the current and past trends in stock market which provides the interactive data visualization based on various stock market indexes in D3.js
- **Mobile Monitoring Android App (2016):** Developed an Application to monitor Call, SMS, and Locations in smartphone that you own or have proper consent to monitor in Android.
- **Automated Cross-site Scripting (XSS) prevention (2016):** Designed automated libraries to protect code injection attack on the insecure websites in PHP and JavaScript.
- **Restful Web Services (2016):** Designed and implemented web services in REST architecture to allow CRUD operations and Hypermedia driven transactions using XML/JSON Data Object in JSP, Java, and Servlets.
